The Quarterly Economic & Business Activity Report provides a quarterly review and analysis of trends in economic and business activities. It is intended to provide a unique perspective on business investments and market conditions within the State of Nevada. Data contained herein is sourced to the Nevada Secretary of State and other reporting agencies, including the Nevada Department of Employment, Training and Rehabilitation.

Business Entity Filings Increase in Final Quarter of 2012 Despite Q4 Growth, Filings Down for the Year

New Entity Filings *[Leading Indicator]*

- New business entity filings increased to 13,704 during the fourth quarter of 2012, up 4.8 percent from the prior quarter (Q3 2012) and 3.8 percent from the prior year (Q4 2011). Despite the latest growth, new filings for the year (2012) declined 3.8 percent when compared to 2011, falling to 56,492 from 58,749.
- Domestic (Nevada) new filings increased 4.1 percent year-over-year to 12,795 during the quarter, with Limited Liability Companies ("LLCs") and Corporations reporting growth of 6.6 percent and 0.5 percent, respectively. Limited Partnerships ("LPs"), which represent just 1.7 percent of domestic filings, reported a 20.5-percent decline when compared to last year.
- The increase in domestic filings was partially offset by foreign (non-Nevada) new entity filings, which declined 6.1 percent from the prior quarter and increased a modest 0.9 percent from last year to 909. Year-over-year, LP and LLC filings increased 23.5 percent and 11.2 percent, respectively, but Corporations declined 8.2 percent.

Total List Filings *[Lagging Indicator]*

- Initial, annual and amended lists filed during the fourth quarter of 2012 totaled 71,728. Compared to the prior quarter, list filings are up 6.4 percent, while they increased 5.1 percent from a year ago. Corporations and LLCs, which represent 94.7 percent of list filings, both reported year-over-year increases, up 1.8 percent and 9.8 percent, respectively.
- In 2012, a total of 287,414 entities filed lists, representing a 1.4-percent decline from 2011. The only entity type that posted an increase was Limited Liability Companies, which were up 1.5 percent year-over-year. Meanwhile, Corporation filings fell by 3.6 percent, while LPs declined 8.0 percent.
- As of December 2012, 281,793 entities were considered to be in "good standing", up 0.4 percent from last quarter, but down 0.8 percent from a year ago.

Ross Miller became the youngest Secretary of State in America and the youngest in Nevada history when he was elected in 2006. Unanimously selected by his peers to serve as President of the National Association of Secretaries of State for 2012, Ross' record of achievement since taking office reflects a true commitment to accountability and results. His accomplishments reflect a combination of enthusiasm for the job, and a vision for serving his constituents.

Analyst's Assessment

“ Although the state's economy remains fragile, by the end of 2012, a number of sectors reported improvements from a year ago contributing to a lower unemployment rate. Nevada's unemployment rate fell to 9.8 percent in December, down significantly from the 12.9 percent reported a year ago, and the lowest rate in four years. Sectors reporting positive annual growth included trade, transportation and utilities (+7,100); education and health services (+6,000); leisure and hospitality (+6,000) and mining (+1,400). The government sector started to show some signs of stabilization, reporting three consecutive months of year-over-year growth (+1,900 in December). Jobs in the construction industry, however, continue to reflect a smaller share of overall employment, declining by 1,500 positions in December; little improvement is expected in the near-term.

Nevada's economy continues to improve in a number of areas with notable stability in consumer spending, tourism and the housing market. Business entity filings also showed positive growth in the final quarter of the year. That said, we did note that the level of new business entity filings in 2012 failed to reach levels reported in 2011. The foundation for positive growth in 2013 has been poured. Key issues to monitor include state and federal fiscal policies, the implications of increased payroll taxes on consumer spending and economic development efforts in the Silver State. ”

Principal Analyst, Applied Analysis

Domestic (Nevada) Entities vs. Foreign (Non-Nevada) Entities – A domestic entity is an entity created pursuant to Nevada Law that may or may not have nexus in Nevada. Its formation documents are on file and a matter of public record in the office of the Secretary of State. A foreign entity is an entity created pursuant to the laws of a jurisdiction other than Nevada, which is qualified to do business in Nevada. Generally, most foreign entities have some sort of nexus in Nevada because they qualify so they may conduct business in Nevada.

Leading vs. Lagging Indicators – Generally, a lagging indicator is a measurable economic factor that changes after the economy has already begun to follow a particular trend or pattern. A leading indicator is a measurable economic factor that changes before the economy starts to follow a particular trend or pattern. Leading indicators can be used to predict changes in the economy. In this instance, new business entity filings provide directional insight into investments and business formation in the State of Nevada.
